Cloud-enabled remote monitoring service for your critical assets

EcoStruxure Asset Advisor at a glance

A vendor-neutral cloud based software that monitors your critical equipment, delivers insights and smart alarming directly to your mobile – proactively minimizing downtime. Instant access to live sensordata via the mobile app ensures visibility into your asset health and lifecycle, whether on premise or on the go.

An affordable 24/7 remote troubleshooting service provides peace of mind and fast issue resolution, enabled by community-based chat with your own team or the Schneider Service Bureau.

24x7 smart alarms & data visibility

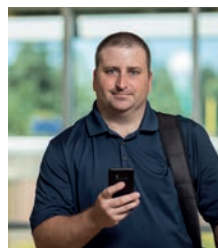

Incidents are automatically created and tracked, providing easy access to real-time incident status and latest device data– with no need for logging into VPN.

Gain insights into your infrastructure

Machine data forms the basis of long-term operational insights and analytics. The monthly report is aimed at optimizing performance through cost reduction recommendations across the physical and IT layer, resulting in reduced equipment maintenance costs.

Engage the right team

Immediate identification of who is on duty, who is on site or close by – and collaborate through chat with your own team or the Schneider Electric Service Bureau if a Field Service Engineer is required onsite.

“Bainbridge Island School District chose EcoStruxure Asset Advisor to help ensure continued availability of its innovative digital learning environment.”

Alan Silcott
Network Supervisor, Bainbridge Island School District
